DETAILED ACTION

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patent # 4,972,188 of Clement et al. does not teach nor render obvious an apparatus for compensating for offset and drift of offset in an amplifier that has, in combination with other limitations, an offset digital-to-analog converter providing a first programmable bias corresponding to an offset of the amplifier circuit, and a drift digital-to-analog converter providing a second programmable bias corresponding to a drift of the offset of the amplifier circuit, the first programmable bias and the second programmable bias being combined and coupled to the node; nor does it have a first programmable offset/drift generator capable of sourcing a first bias to the amplifier node compensating for a first portion of the offset and a first portion of the drift of the offset of the amplifier circuit', and a second programmable offset/drift generator capable of sourcing a second bias to the amplifier node compensating for a second portion of the offset and a second portion of the drift of the offset of the amplifier circuit, wherein the rate of drift compensation with temperature of the second bias is different from the rate of compensation of the second bias, such that by suitable programming of the first and second programmable offset/drift generators the compensation of the offset and the offset of the drift of the amplifier circuit may be optimized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 4,972,188, # 6,628,169 B2, # 5,386,160, # 4,833,423, # 5,010,302, and # 4,495,470 contain some limitations of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia T. Nguyen whose telephone number is (703) 308-1927. The examiner can normally be reached on 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on 703-309-4940. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
